

The Tinnitus Clinic Desensitisation Therapies

Mr. Kemsley

Tinnitus Desensitisation Therapy™

“After Mark set up my treatment, it took some time but it has made a significant improvement on my tinnitus. I have experienced a significant reduction in the noise and now only need to use the devices occasionally. I feel mentally able to handle my tinnitus now, whereas it was a very disturbing experience prior to treatment. I am able to get on with my life much better than two years ago.”

Mr. McAuliffe

Tinnitus Desensitisation Therapy™

“I went to The Tinnitus Clinic to seek help with my long standing tinnitus. I had a very pleasant experience at the clinic and was received by a very friendly and supportive team. My clinician was very helpful and recommended I commence treatment with combination digital hearing aids. This has greatly reduced the intrusiveness of my tinnitus, but has also given me back a large portion of my hearing, which I was not expecting. My clinician was very informative and the treatment has transformed my life.”

Janice Dyson

Tinnitus Desensitisation Therapy™

“Now I am 80 per cent better. I can still hear the noise but it’s nowhere near as loud. I’m back to sleeping normally and going out socialising again.”

Mr. Hussain

Tinnitus Desensitisation Therapy™

“A professional, focussed service towards my hearing requirements, which is helping me manage my tinnitus.”

Mr. Aitken

Hyperacusis Desensitisation Therapy

“Thanks to the treatment I have received from the Clinic I have been able to manage my hyperacusis better and get my life back.”

Mr. Langley

Hearing Loss and Tinnitus Desensitisation Therapy™

“I am very satisfied with the service I received at the clinic. Due to my severe hearing loss and the loud tinnitus that I experience, I am a very difficult case to treat. With their skill, patience and service I can handle my tinnitus and hearing much better.”

Richard Baines

Hyperacusis Desensitisation Therapy

“Treatment for my hyperacusis spanned a six-month period. In January this year, tests revealed that the sensitivity that my ears were experiencing had virtually disappeared. This was a huge relief!”
